Professional Summary

Graduate Computer Science student with hands-on experience in technical troubleshooting, customer support, hardware projects, and software development. Background includes frontline technical support at T-Mobile, educational technology environments, and personal programming projects using Python and embedded systems. Skilled at diagnosing technical issues, communicating solutions to non-technical users, documenting processes, and learning new technologies quickly. Seeking an IT Support, Help Desk, Client Support Engineer, Technical Support, or Systems Support role where I can combine strong customer service experience with a growing technical skillset.

Technical Skills

Programming: Python, Object-Oriented Programming (OOP), Basic SQL

Operating Systems: Windows, macOS, Linux Command Line (Basic)

IT Support: Desktop Support, Technical Troubleshooting, Software Installation, Hardware Troubleshooting, Mobile Device Support, Remote Support, User Onboarding

Networking: TCP/IP Fundamentals, DNS Fundamentals, DHCP Fundamentals, NAT, IP Configuration, Network Troubleshooting

Tools: Git, GitHub, VS Code, Arduino IDE, Microsoft Office

Hardware: ESP32 Microcontrollers, Embedded Systems, WS2812B LED Systems, Basic Circuit Design, Soldering

Professional Skills: Technical Documentation, Customer Support, Problem Solving, Data Tracking, Team Collaboration

Education

Merrimack College

North Andover, MA

Master of Science in Computer Science (Software & AI Track)

Jan 2026 – Present

- Coursework includes Python Programming, Algorithms, Backend Development Fundamentals, Discrete Mathematics, Object-Oriented Programming, and Software Development practices

University of Massachusetts Lowell

Lowell, MA

Bachelor of Arts in Composition for New Media

Sep 2019 – May 2025

- Studied digital media production, technology, and collaborative project development while building strong written communication and presentation skills

Experience

Northshore Education Consortium

Aug 2024 – Present

Instructional Assistant

Beverly, MA

- * Provide day-to-day problem solving and support in a fast-paced educational environment
- * Assist with technology-supported instruction and perform basic troubleshooting of classroom technology
- * Maintain detailed records and data tracking systems used by staff and administrators
- * Collaborate with multidisciplinary teams while adapting quickly to changing operational needs

Behavior Learning Center

Oct 2022 – Jan 2026

Behavior Technician

Massachusetts

- * Maintained detailed documentation and performance tracking systems requiring high levels of accuracy
- * Collected, analyzed, and reported data to support decision making and program adjustments
- * Developed strong communication, problem-solving, and client-facing support skills

CVS Pharmacy

Jun 2022 – Aug 2023

Pharmacy Technician

Malden, MA

- * Worked within multiple software systems in a high-volume environment while maintaining accuracy and efficiency
- * Resolved customer issues and supported workflow processes using internal technology platforms
- * Quickly learned new software systems, procedures, and compliance requirements

T-Mobile

Jun 2020 – Jun 2022

Sales Associate

Saugus, MA

- * Provided frontline technical support for smartphones, tablets, hotspots, and connected devices
- * Diagnosed and resolved connectivity, account access, device setup, software update, and configuration issues
- * Assisted customers with device onboarding, data transfers, troubleshooting, and account recovery
- * Explained technical concepts clearly to customers with varying levels of technical experience
- * Recognized as a top-performing employee in a competitive customer-facing environment

Projects

MSP Ticketing System | *Python, JSON*

2026

- * Developing a help desk ticket management system to model real-world MSP support workflows and ticket lifecycles
- * Implementing ticket creation, prioritization, status tracking, assignment, and resolution documentation
- * Designing object-oriented data models and JSON-based persistence to support reliable storage and retrieval of ticket information
- * Applying software design, input validation, and workflow management principles to simulate practical IT support operations

ESP32 LED Audio-Visual System | *ESP32, C++, FastLED, Arduino IDE*

2026

- * Designed and built an interactive LED matrix system utilizing an ESP32 microcontroller and 240 addressable LEDs
- * Developed custom lighting effects including rain, snow, and storm animations using FastLED
- * Diagnosed and resolved hardware, wiring, and power-distribution issues to improve reliability
- * Integrated hardware and software components while testing and validating system functionality

Banking System Simulation | *Python*

2026

- * Developed a command-line banking application supporting account creation, deposits, withdrawals, and balance tracking
- * Applied object-oriented programming principles, input validation, and error handling
- * Implemented modular code organization to improve maintainability and readability
