Professional Summary

Graduate student pursuing a Master of Science in Computer Science with hands-on experience developing software projects in Python. Strong foundation in object-oriented programming, algorithms, debugging, data structures, and problem solving. Experienced collaborating in team environments, documenting technical work, and learning new technologies quickly. Seeking an entry-level Software Engineer, Backend Developer, QA or Technical Developer role where I can contribute to building reliable software systems while continuing to expand my engineering skills.

Education

Merrimack College

North Andover, MA

Master of Science in Computer Science (Software & AI Track)

Jan 2026 – Present

- Developing software engineering, algorithms, and backend development skills through graduate-level coursework and hands-on programming projects

University of Massachusetts Lowell

Lowell, MA

Bachelor of Arts in Composition for New Media

Sep 2019 – May 2025

- Developed strong written communication, collaboration, and project management skills through interdisciplinary coursework

Technical Skills

Languages: Python, SQL (PostgreSQL), HTML/CSS (Basic)

Concepts: Object-Oriented Programming, Algorithms, Data Structures, Debugging, Input Validation, Software Testing, Backend Development Fundamentals

Tools: Git, GitHub, VS Code, PostgreSQL, Arduino IDE

Technologies: JSON, REST API Fundamentals, Linux Fundamentals, Command Line Interfaces

Hardware: ESP32 Microcontrollers, Embedded Systems, WS2812B LED Systems, Basic Electronics

Projects

MSP Ticketing System | *Python, JSON*

2026

- Developing a help desk ticket management system to model real-world MSP support workflows and ticket lifecycles
- Implementing ticket creation, prioritization, status tracking, assignment, and resolution documentation
- Designing object-oriented data models and JSON-based persistence to support reliable storage and retrieval of ticket information
- Applying software design, input validation, and workflow management principles to simulate practical IT support operations

ESP32 LED Audio-Visual System | *C++, ESP32, FastLED, Arduino IDE*

2026

- Designed and implemented software for a 240-LED interactive matrix powered by an ESP32 microcontroller
- Developed custom animation algorithms including rain, snow, leaves, and storm effects
- Diagnosed and resolved hardware integration and power distribution issues through systematic testing and debugging
- Designed software architecture to support future expansion including scene selection and additional input methods

Banking System Simulation | *Python*

2026

- Developed a command-line banking application supporting account creation, deposits, withdrawals, and balance management
- Applied object-oriented programming principles to model customer accounts and banking operations
- Implemented input validation and error handling to improve reliability and user experience
- Practiced software design, debugging, and testing techniques through iterative development

Experience

Northshore Education Consortium

Aug 2024 – Present

Instructional Assistant

Beverly, MA

- Maintained structured data tracking systems supporting student progress and operational decision-making
- Assisted with troubleshooting classroom technology and resolving technical issues in a fast-paced environment
- Collaborated with multidisciplinary teams to adapt plans and solve unexpected challenges
- Documented observations and performance metrics with a strong emphasis on accuracy and consistency

Behavior Learning Center

Oct 2022 – Jan 2026

Behavior Technician

Massachusetts

- Collected, maintained, and analyzed performance data to support individualized treatment plans
- Created and maintained detailed documentation while adhering to established procedures
- Adapted quickly to changing requirements and solved problems in dynamic environments
- Collaborated closely with clinical teams to improve outcomes and operational efficiency

CVS

Jun 2022 – Aug 2023

Pharmacy Technician

Malden, MA

- Worked with high-volume information systems requiring accuracy, attention to detail, and process compliance
- Resolved customer and workflow issues while navigating multiple software platforms
- Learned new systems and procedures quickly while maintaining productivity and service quality

T-Mobile

Jun 2020 – Jun 2022

Sales Associate

Saugus, MA

- Troubleshoot mobile device, connectivity, and account-related technical issues for customers
- Provided hands-on technical support for device configuration, setup, migration, and onboarding
- Explained technical concepts to non-technical users and resolved customer concerns
- Consistently ranked among top-performing team members in a metrics-driven environment
